

Client QA Signoff

Date: 2026-03-17 Project: Billing App

Summary

A full QA verification was completed for the latest release of the Billing App, covering the main business workflows and primary user actions across the system.

Testing included:

- User login and authentication
- Dashboard navigation
- Customer management
- Sales Invoice workflow
- Purchase Bill workflow
- Sales Proforma workflow
- Convert Proforma to Invoice flow
- Payment In and Payment Out flows
- Reports and export
- Backup and settings
- Route smoke testing
- Validation and edge-case checks

Test Results

- Playwright end-to-end tests: 12/12 passed
- Existing automated logic/regression tests: 6/6 passed
- Production build verification: passed

Key Flows Verified

- Login and owner setup
- Customer create, edit, and archive
- Invoice creation and validation
- Proforma creation, payment application, and conversion to invoice
- Payment allocation and advance handling
- Reports export

- Backup export and restore
- Settings save and update
- Major page and navigation loading

Final QA Confirmation

All core features covered in this release have been tested successfully and are working correctly in the verified environment.

Special attention was given to financial accuracy, including:

- Proforma paid and balance calculations
- Payment allocation behavior
- Convert to Invoice flow accuracy
- Totals and outstanding amount handling

Signoff Status
